

This is an EXFO Connect-enabled feature for service providers who want to allow contractors to securely connect test sets to their EXFO Connect server.

SERVICE PROVIDERS GET:

- › Complete visibility of a contractor's activities
 - › Track and measure their performance
- › Instantaneous test results/data reporting
 - › No manual intervention
- › Standardized testing procedures across network/contractors
 - › Consistent results
- › Automated testing and reporting procedure
 - › 100% first-time-right jobs
- › Faster, less expensive activation

CONTRACTORS GET:

- › Access to test procedures/configuration files/training videos
- › Online technical support
- › Automated testing functionalities
 - › Increase field tech performance
 - › Eliminate repeat jobs
 - › Optimize operational efficiency
- › Automated reporting functionalities
 - › No more USB-key file swapping
 - › No more email attachments
 - › Minimal manual data entry

Test-Results Upload

- › Auto-queuing for quick confirmation and one-click upload
- › All test parameters stored in dynamic database for customized reporting

Increase technician efficiency, speed up deployment and obtain true business intelligence

Rapid Contractor Provisioning

- › New contractor test sets added in minutes
- › Test set licenses can be reassigned from previous contractors

Break down workflow optimization barriers with cost-effective and flexible contractor management

Remote Control

- › Centralized, remote access to any FTB test set
- › No setup required

Resolve issues on-the-spot

File Download

- › Automatic download upon server connection
- › Test procedures, configuration files, 'how-to' training videos, work orders

Provide all the resources a contractor's technician needs to do the job right

Wide Range of Test Types

- › FTB-1, FTB-200 and FTB-500 transport/datacom, optical and copper access modules
- › Optimization efficiency extended to new technologies and services

Support contractor workflow automation for any network or service deployment project

Data Security

- › Segregated access per contractor
- › Data encrypted in storage as well as in transit

Ensure confidentiality between contractors and keep your data private

About EXFO Connect

EXFO Connect is a comprehensive, cloud-based, asset-management system that is specially designed to optimize telecom field test workflow. The software services delivered by EXFO Connect include a powerful reporting engine, 24/7 global access through a Web-based interface, secure communication links, application programming interfaces (APIs) as well as a fully managed infrastructure for security, backups and updates.
