

# Cut testing time, not corners

Industry's only solution for fast  
single-ended CD/PMD testing.

Test chromatic dispersion (CD) and  
polarization mode dispersion (PMD)  
with just one compact device:

- All-in-one
- Single-ended
- Connected

## FTBx-570 DISPERSION ANALYZER

Links over 10 km or with speeds above 10 Gbit/s require dispersion testing.  
Boost efficiency and halve CAPEX/OPEX by dispatching one technician • one tester • one truck roll.

- **Unique efficiency**  
CD/PMD tests from a single location.
- **Standards compliance**  
ITU-T G.650.3, EIA/TIA FOTP-175B,  
EIA/TIA FOTP-243 and IEC 61282-9
- **Rapid and accurate**  
CD and PMD results in 30 seconds  
or less.
- **Connectivity**  
Cloud-hosted capabilities for  
job management and reporting  
with EXFO Exchange.
- **Compact**  
The FTBx-570 comes with a compact  
form factor that is optimized and  
ruggedized for field use.
- **Extensive band coverage**  
Tests O-band and SCL-bands.
- **Single-button operation**  
Avoid human errors and get  
the right results the first time.
- **User-friendly GUI**  
Benefit from a fully automated and  
highly intuitive user interface.
