

EXFO Professional Services and Solutions

Bringing Your Business Processes to a Whole New Level

Our Professional Services experts are available to help you increase the efficiency and value of strategic initiatives while minimizing capital investment, complexity and drain on company resources.

EXFO's Professional Services team can work with you to optimize and maintain the best test environment for your needs, leveraging leading EXFO test solutions for the telecom domain to support multiple protocols, such as IMS, VoIP, LTE, VoLTE, and legacy.

Using EXFO solutions, our team of global experts can help you maintain your test environment and identify issues in your device/system under test

(DUT/SUT). Our experts will provide planning and help execute testing by creating quality scripts for advanced automation using EXFO's simulator tools testing the RAN, wireless core, IMS and legacy networks.

EXFO's Professional Services experts offer you the immediate resources you need to expedite the return on investment (ROI) of your EXFO product(s), and our services are available over both short- and long-term periods. Working independently, or in partnership with your engineers, our staff will incorporate EXFO simulator tools and technology into your business processes and ensure that your solutions are up and running properly and efficiently.

Key Benefits

› Planning and Test Execution

Script creation and debugging for negative scenarios, creation of state machines and network element test procedures

› Automated Testing Services

Leverage our expertise in developing automated tests and building regression test scripts

› Business Process Optimization

Get solutions up and running quickly while embedding EXFO simulator tools and technology into your business processes

› Performance Test Services

Leverage our expertise in developing and building traffic test scripts

EXFO Professional Services and Solutions

EXFO Test Consulting

- › Off-site consulting
- › On-site consulting
- › Combination of on-site/off-site consulting

EXFO Test Services

- › Project management based on scope of work
- › EXFO simulator product scripting
- › Script debugging
- › Cost-efficient outsourcing

EXFO's Simulator Training Offering

- › Detailed explanations and exercises for the required protocols
- › In-depth coverage of functionalities (for single and multiple interfaces)
- › Debugging and troubleshooting
- › Customization based on customers requirements
