

Working with Linear Drive Optics?

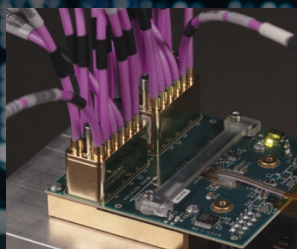

No retimer, no DSP?

No problem—test with **EXFO's BA-4000**

Industry-leading BER testing with integrated tools to optimize channel generation and compensate detection losses.

BA-4000
800G Bit Error Rate
(BER) tester

Design of Linear
Drive Optics

Integration into Linear
Pluggable Optics

Quality control in
manufacturing

Linear
Pluggable
Optics

From the communications industry's test, monitoring and analytics experts.
